SOLUTION BRIEF · BY INDUSTRY

Arlabs for Smart City & Transport

Command centres, monitoring and citizen services for cities and corridors.

The challenge

Cities and infrastructure operators need a single operational picture across cameras, traffic, incidents and field teams — not a wall of disconnected systems.

How Arlabs helps

- ✓ Unify monitoring, incidents and dispatch in one command centre
- ✓ Add AI video, traffic and flood insights as modules
- ✓ Push work to field teams and track it to closure

In practice

> EXAMPLE
>
> An operations centre watches live feeds and sensors, raises incidents, and dispatches the nearest crew — all from one screen.

Why it works

Work is captured where it happens, verified before it counts, and reported from one trusted record. Every product runs on the same stack, so modules can be combined and extended as the operation grows — without a rip-and-replace later.

RECOMMENDED PRODUCTS

Products that fit

Recommended starting points for smart city & transport — each is a complete product on its own and integrates with the others.

COMMAND CENTRE

Arlabs Command

A modular intelligent-operations system for cities and large operators — bringing every camera, sensor, drone, satellite and dataset onto one live map, with AI analytics,...

12 modules

FLAGSHIP PRODUCT

Arlabs CRM & Operations

A complete operations system that unifies maintenance, field inspection, asset management, public complaints and multi-stage claims into one role-based system — from mobi...

14 modules

Getting started

1 · Scope

A short discovery session to map your workflows, roles and sites to modules.

2 · Pilot

One workflow with one team, proving verified daily data and reporting.

3 · Roll out

Train users, migrate data and expand module by module with support.

Product whitepapers and briefs for each recommended product are available in the Arlabs resource centre.
